

National Officials Certification Summary

The National Officials Certification Program is administered by the USA Swimming Officials Committee. Its primary goal is to expand the education of officials through mentoring, participation and evaluation as well recognizing those officials who have demonstrated their knowledge of swim officiating at each level and position.

There are two levels of National Certification – N2 and N3 – for each of 5 positions:

- Stroke and Turn Judge,
- Chief Judge,
- Starter,
- Deck Referee
- Administrative Referee

N2 The first National level for a position – recognizes that an official is experienced and has been evaluated as capable of working the position at Sectional, Zone, Grand Prix and similar higher profile meets.

N3 The second National level for a position – recognizes that an official has the experience, skills and knowledge to be considered for selection to work National Championship level meets in the position.

Certification

Certification at any level requires a combination of several things including evaluations, local participation at meets, continuing education, and the training and mentoring of other officials. Tables on the following pages outline the requirements for certification and recertification.

Length of Certification

Initial certification for a position will extend the expiration for all certified positions to either June 30th or December 31st for a minimum of three years. If, as part of an initial certification, the official has satisfied all re-certification requirements for all other certified positions, the expiration date of all positions will be extended for a minimum of three years from the date of application.

Evaluation

Evaluations can only be done at Officials Qualifying Meets (OQMs). An OQM may be approved for N2 evaluations or N3 evaluations or a combination of N2 and N3 by position. For example, an OQM may be approved for N3 Stroke & Turn but only N2 for the other positions. The level of evaluations permitted at a given OQM is determined by the capabilities of the assigned evaluators along with the level of the meet and the procedures and protocols to be used at the meet. Note: When satisfactory Initial and Final N3 evaluations are required, they cannot be by the same evaluator or done at the same meet.
